All my dogs used in my breeding program have full health checks before they are bred. You can go to the OFA website and see that they have clearances for the following: heart, eyes, thyroid, hips and elbows. You can check by the dog's name. Whether being placed in companion homes or show homes, I always try to breed the best Great Danes possible, both physically and mentally. I am always willing to mentor or assist people who are willing to cooperate with showing or training their dogs in performance venues, such as obedience, agility, etc. I prefer to crop the Great Danes I breed, as I prefer this appearance. Also, in my opinion, there was and are still valid reasons for cropping your Great Dane. I can discuss them if you would like. If you are serious about owning a "Paquestone" Great Dane, please take time to fill out this questionnaire and we can go from there. Completing this questionnaire will help me place the right puppy with you. Any information you send me will be confidential.
